Projects

MY portfolio 📄

A comprehensive snapshot of my professional journey is encapsulated in this website. Leveraging React.js for optimal speed and exceptional performance ensures a seamless and user-friendly content browsing experience. The site is fully responsive, adapting seamlessly to all screen sizes.

Task Management System 📄

Developed a responsive web application using React, Redux Toolkit, Material UI, and React Hook Form for managing tasks with features like task filtering, validation, category creation, and backend simulation via MockAPI.

E-commerce 📄

E-commerce project is a cutting-edge web application developed using React as the front-end framework, and it is integrated with a Realtime API to provide a seamless and responsive user experience. This platform is designed to offer a wide range of products to customers, along with features that facilitate easy Sign up , Sign in, online payment, and product reviewing.

Hydra 📄

A professionally designed, user-friendly landing page was created using HTML and CSS to offer an immersive experience with seamless responsiveness across all devices.

LA COLLECTION (E-commerce) 📄

Developed a feature-rich e-commerce application using React and Redux, dynamic cart functionality with real-time updates, implementing user authentication (login and registration) and product filtering by categories to enhance the user experience.

Weather Application

An app designed to enhance daily life by providing users with up-to-date weather information and forecasts, empowering them to make informed decisions and plan their activities effectively.

City Life web Application

ReactJS, Bootsrap, Stripe payment

City Life Mobile Application,

React Native, React Navigation, Native Base, Stripe

SKILLS

Interpersonal:

Interpersonal: (Communication, presentation , problem-solving, Analytical, positive thinker, capable to see the whole vision and Attention to details)

Computer:

(Microsoft Office, Visual Studio)
